In Switzerland, these financial instruments are considered structured products. They are not collective investment schemes within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA), and are therefore not subject to the regulations of the CISA or the supervision of the Swiss Financial Market Supervisory Authority FINMA. The investors bear the issuer's and the Guarantor's credit risk respectively.

Product Description

Strategic Certificates are Tracker Certificates and offer the opportunity to participate in the performance of a strategy determined by the Index Sponsor. This strategy is implemented by means of a discretionary, notional index that aims to reflect the performance of a real portfolio based on this strategy. The performance of the index and thus also of the Strategic Certificates reflects the performance that a real portfolio would have if it were managed on the basis of the strategy, charged with fees and costs. The Index Sponsor is responsible for selecting the respective index components from the defined universe and the time of index adjustments.

The risks associated with an investment in Strategic Certificates and the associated earnings potential are comparable to an investment in a real portfolio consisting of the respective components of the notional index. However, investors (either jointly or in any other way) do not acquire any contractual or property rights against to any asset pool, against the virtual index portfolio or against any component of this index or strategy. There is no claim to the index or its components at any time, e.g. neither in the event of redemption, exercise or termination of the Strategic Certificates nor in the event of default by the Issuer. In addition, investors are not entitled to request direct investments in (i) the index components or (ii) other investment products that track or replicate the development of the index.

Underlying

Gigant High Income Emerging Market Bond Strategy Index	<p>The Underlying is a discretionary, notional index calculated in USD. The Index reflects the performance of a hypothetical portfolio, which is compiled and continuously managed by the Index Sponsor in accordance with the Strategy determined by it.</p> <p>The Strategy of the Index Sponsor aims to provide exposure to Emerging Market Bonds, from both corporate as well as sovereign issuers. A particular emphasis will be put on bonds from Turkish issuers. The index may contain Emerging Market Bonds, Money Market Instruments as well as cash amounts in different currencies.</p> <p>Investors can thus invest in the same performance as a real portfolio that would be managed according to the strategy and charged fees and costs.</p>
Index type	Performance Index (Net Return)
Index Sponsor	Gigant Swiss Consulting AG, Bodmerstrasse 9, 8002 Zurich, Switzerland
Index Calculation Agent	Bank Vontobel AG, Financial Products, Gotthardstrasse 43, CH-8002 Zurich
Information Page	<p>https://indices.vontobel.com</p> <p>Guidelines (description and rules) on the Underlying, information on performance and the composition of the Underlying are available on the Information Page. On the Information Page, the Index Calculation Agent also publishes changes to the Guideline and other changes.</p>

Costs and fees

One-off Costs	None	
Ongoing Costs	Index Fee	1.50% p.a.
		The Index Calculation Agent reimburses the Index Sponsor for its services. The Index Sponsor receives between 0.5% and 1.25% p.a.; otherwise, the Index Fee remains with the Index Calculation Agent.
	Other Index Costs	In the case of index adjustments, adjustment fees and other costs may apply. More detailed information, in particular on the amount of the fees in case of index adjustments, can be found in the Guide to the Underlying.
		Ongoing costs are generally calculated pro rata temporis by the Index Calculation Agent and deducted pro rata temporis from the cash amount on each index day. Other index costs are charged to the cash amount on a per-situation basis. This reduces the value of the index and thus the value of the Strategic Certificates.
		The index components themselves can also be subject to fees and costs and thus indirectly have a reducing effect on the value of the index. Such fees, e.g. management fees and distribution fees for collective investment schemes/investment units and structured products, are outlined by the respective manager/issuer in the respective documentation of the index component (e.g. prospectus).
Distribution Fee	No distribution fees are included in One-off and Ongoing Costs.

All payments from this product will occur with any applicable taxes and duties deducted.</p> <p>The taxation mentioned is a non-binding and non-exhaustive summary of the applicable treatment of Swiss-domiciled private investors for tax purposes.</p> <p>The investor's specific circumstances, however, are not taken into account. We point out that Swiss and/or foreign tax law or the authoritative practice of Swiss and/or foreign tax authorities can change at any time or specify further tax or charge liabilities (possibly even with retrospective effect). Potential investors should have the tax effects of the purchase, holding, sale or repayment of this product examined by their own tax adviser - especially with respect to the effects of taxation under another jurisdiction.</p>

Prospects of Profit and Losses

Any potential profit consists of the positive difference between the sales price achieved or Redemption Amount (in the event of termination or exercise) and the purchase price. The Strategic Certificates do not provide any current income. The performance corresponds mainly to that of the underlying Index. A loss is made if the Certificate is sold or redeemed at a lower rate than the purchase price paid. Such a negative scenario can occur if value-determining factors such as interest developments, ratings, changes in creditworthiness or exchange rate developments have a negative effect on individual or several Index components. Negative results due to the Index Sponsor's Investment Strategy cannot be precluded and neither the Issuer nor the Calculation Agent accept any responsibility for the success or for a specific performance of this Investment Strategy. Strategic Certificates don't provide for any capital protection, meaning that the investors may incur a total loss of the capital invested.

Assumptions and limitations in preparing the market scenarios

The following market scenarios should afford the investor a simplified way of making an assessment of the significant factors that influence the investment performance of the certificate. For a precise analysis of the profit and loss scenarios, reference must be made to the formulas and definitions set out in this Termsheet, (e.g. for "reimbursement"), because these scenarios have been deliberately simplified in order to make them better understandable. With the exception of those certificates for which one of the following factors is defined as the Underlying (e.g. a currency certificate or a certificate of interest), the impact of these risk factors will be excluded from the simplified presentation of the scenario

- Foreign currency risks
- Interest rate risks
- Volatility risks
- Issuer risk
- Fees and costs both stemming from the certificate and for the acquisition and holding of the certificate

Market scenarios

Maximum gain: Underlying's performance

Maximum loss: 100%

Positive scenario:

Indicative performance of the certificate: 0% to Underlying's performance

Necessary performance of Underlying:

- Proportional participation in positive performance

Breakeven:

Indicative performance of the certificate: 0%

Necessary performance of Underlying:

- Closing price of Underlying = reference price level at the time of the investment

Negative scenario:

Indicative performance of the certificate: Loss of up to 100% possible

Necessary performance of Underlying:

- Closing price of Underlying is lower than the reference price level at the time of the investment

Significant Risks for Investors

Currency risks

If the Underlying or Underlyings is/are denominated in a currency other than the product's reference currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the Underlying(s) but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Market risks

The general market performance of securities is dependent in particular on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the structured product. There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the structured products. Such occurrences can have an effect on the time of redemption and/or on the value of the structured products.

In the event of trading restrictions, sanctions and similar occurrences, the Issuer is entitled, for the purpose of calculating the value of the structured product, to include at its own discretion the Underlying instruments at their most recently traded price, at a fair value to be established at its sole discretion or indeed as worthless, and/or additionally to suspend pricing in the structured product or liquidate the structured product prematurely.

Secondary market risks

Under normal market conditions, the Issuer or the lead manager intend to post bid- and ask-prices on a regular basis. However, neither the Issuer nor the lead manager is under any obligation with respect to investors to provide such bid- and ask-prices for specific order or securities volumes, and there is no guarantee of a specific liquidity or of a specific spread (i.e. the difference between bid- and ask-prices), for which reason investors cannot rely on being able to purchase or sell the structured products on a specific date or at a specific price.

No property rights, no special funds

This certificate corresponds to a theoretical reproduction of the components contained in the Index. The Issuer is not obliged to actually reproduce these components in respect to the Index, which is why no special fund is created for this certificate. Accordingly, the certificate holders have no rights (property rights, separation rights etc.) to the Index components.

Issuer risk

The value of structured products may depend not only on the performance of the Underlying(s), but also on the creditworthiness of the Issuer/Guarantor, which may change during the term of the structured product. The investor is exposed to the risk of default of the Issuer/Guarantor. For further information on the rating of Vontobel Holding AG or Bank Vontobel AG, please see the Issuance Program.

Index Sponsor

The performance of the Index depends on, among other things, the Index Sponsor's competence in selecting the Index components and the timing of the Rebalancings. Neither the Issuer nor the Guarantor monitor the rebalancing advice made by the Index Sponsor in this respect and assumes no responsibility for them.

Leverage

The Index' universe and strategy may allow for Derivative Instruments enabling Index' notional exposure exceeding the value of the Index, i.e. there will be leverage. The leverage might vary during the term of the certificate subject to, among others, the use of Derivative Instruments and the value of the Index. Any change in Derivative Instruments' underlying will, depending on the Current Leverage, have a disproportionate effect on the value of the certificate.

Stop loss

To make sure that the Index doesn't reach a negative value the terms of the certificate provide for a stop loss that will be activated along the drop, but between the moment the stop loss gets activated and the moment the Issuer can terminate the certificate and determine the Redemption Amount, there will be a delay during which the drop of the value of the Index can exceed the level of the stop loss (the buffer).

Classification

In Switzerland, these financial instruments are considered structured products. They are not collective investment schemes within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA), and are therefore not subject to the regulations of the CISA or the supervision of the Swiss Financial Market Supervisory Authority FINMA.
